LeaderLabs

8 LEADERLABS (WORKSHOPS)

Fun, engaging and interactive workshops

LeaderLabs create the opportunity for participants to test out their skills as Insightful, Empowering, Engaging & Grateful team members and leaders.

Inspiring leaders use ALL the colors in the box

Inspiring leaders color OUTSIDE the lines

Inspiring leaders know that even BROKEN crayons still color

Inspiring leaders know a PICTURE is worth a thousand words

Each LeaderLab is designed:
- ✓ To be facilitated in 30 – 45 minutes
- ✓ For any size group (5 – 200 participants)
- ✓ Requires a minimal about of supplies (paper, tape and crayons)

After attending a LeaderLab, participants are provided the facilitation outline and are encouraged to facilitate the LeaderLab with their teams.

Group Hula Hoop

Participants will learn the three basic facts of collaboration using a hula hoop that appears to have a mind of it's own.

Tallest Freestanding Structure

Participants are challenged to use every available resource in the room to build the tallest tower out of only paper and tape. Hint … sometimes the answer is right in front of us!

Toxic Waste Challenge

Participants are confronted with a seemingly impossible task that can only be accomplished when everyone feels safe and has the confidence to succeed.

Flight Test

Participants must build, promote and test the "next best aircraft" using the customer's criteria of speed, distance and smoothness of flight. Remember… the customer is always right!

INSIGHTFUL

EMPOWERING

Developing Inspiring Leaders to be…

ENGAGING

GRATEFUL

Feedback Experiment

Participants will test their ability, and their assumptions, to guide three team members to an item in the room using only non-verbal communication.

Leaderality Twister

Participants are presented with over twenty traits that allow each person to self identify and reveal their unique strengths while valuing the diversity of others.

Desert Survival

Participants are stranded in the middle of the desert and are provided a box of 15 items to rank in importance of their survival needs. The team's survival is based on thinking outside the box.

Pat on the Back

Participants go back to kindergarten to learn the value of kindness and the power of recognition.
